

School Lunch Program – Launch Update

We want to let families know that the **launch of the School Lunch Program at our school will be delayed** as final preparations are completed.

The school's lunch provider is actively working to prepare for the start of service and to ensure they are fully ready to provide students with **consistent, high-quality lunch service** when the program begins.

What happens next?

As soon as the provider is ready to launch, **families will be contacted with the information needed to register and begin ordering lunches**. This will include:

- Registration and online ordering instructions
- Information about menus and meal options
- Ordering and payment information
- Information about available financial support
- The confirmed date that lunch service will begin at your school

There is no action required from families at this time.

We look forward to welcoming your family to the School Lunch Program and providing students with access to healthy, affordable lunches at school.

For questions related to the School Lunch Program, please contact SchoolLunchProgram-programmededineresscolaires@gnb.ca.
